Control measure - Protect work at height equipment in use 3

Control measure - Protect work at height equipment in use

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Protect work at height equipment in use or storage

Learning outcome

Understand:

- Control the hazards to work at height equipment using the hierarchical approach:
 - Removing the hazard
 - Avoiding the hazard
 - Protection against the hazard
- How work at height equipment may be damaged during use

Practical application

Control measure element

All personnel should:
Check that work at height equipment has not been contaminated or damaged while stored

Learning outcome

Demonstrate the ability to:

- Check work at height equipment for contamination or damage
- Immediately report any contaminated or damaged work at height equipment
