Control measure - Identify the potential explosive effects due to the failure of a cryogenic gas container

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Identify the potential explosive effects due to the failure of a cryogenic gas container

Learning outcome

Understand:

- How cryogenic gas containers fail
- How to monitor and identify changes to cryogenic gas containers
- How other materials may react with cryogenic materials

Practical application

Control measure element

Identify the potential explosive effects due to the failure of a cryogenic gas container

Learning outcome

Demonstrate the ability to:

- Monitor and identify changes to cryogenic gas containers
- Apply preventative measures to reduce risk of cryogenic materials becoming contaminated
- Gather information from on-site staff to inform incident plan
