Control measure - Substance identification: Corrosive materials 3

Control measure - Substance identification: Corrosive materials

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Gather information and recognise symbols, labels and other marking to identify corrosive materials

Learning outcome

Understand:

- Classification and labelling of corrosive materials
- Signage identifying the presence of corrosive materials
- Procedures for Litmus and pH scale testing of corrosive materials
- Considerations when observing/monitoring for signs of corrosion

Refer to – Substance identification – Hazardous materials training specification

Practical application

Control measure element

Learning outcome

Gather information and recognise symbols, labels and other marking to identify corrosive materials

Demonstrate the ability to:

- Use signs, labels and markings to identify the presence of corrosive materials
 - Identify and interpret corrosive material incident information and where appropriate use detection equipment
 - Use specialist advice to identify corrosive materials information
 - Assess the risk of fire from corrosive materials
- Refer to – Substance identification – Hazardous materials training specification
