Contents

Hazard - Civil Emergencies 3
Control measure - Carry out civil protection duties relating to legislation and national guidance 3

Hazard - Overwhelmed/overloaded communications systems 4
Control measure - Manage congestion of radio communications on the incident ground 4

Hazard - Ineffective multi-agency working 5
Control measure - Multi-agency co-location 5
Control measure - Multi-agency communication 6
Control measure - Multi-agency co-ordination 7
Control measure - Joint understanding of risk 8
Control measure - Shared situational awareness 8

Hazard - Ineffective strategic response arrangements to support major incidents 9
Control measure - Local emergency planning group arrangements 9
Control measure - Strategic co-ordinating groups 10
Control measure - Tactical co-ordinating groups 11
Control measure - Additional resources: Major incidents 12

Hazard - Major resource requirements 13
Control measure - National Coordination and Advisory Framework (NCAF) and mutual aid arrangements 14
Control measure - National Resilience Assurance Team (NRAT) and National Resilience Fire Control (NRFC) 14
Control measure - Government liaison 15

Hazard - Public awareness 16
Control measure - Warn, inform, instruct and update people: Major incidents 16
Control measure - Media Liaison Officer (MLO) 18

Hazard - Multiple casualties 19
Control measure - Plan reception centres 19
Control measure - Establish a triage sieve (adult and paediatric) 20
Control measure - Mass casualty and fatality plans 20
Control measure - Use casualty transport equipment 21

Hazard - Civil Emergencies

Knowledge and understanding

Hazard	Learning outcome
Civil Emergencies	Understand all associated hazard knowledge

Control measure - Carry out civil protection duties relating to legislation and national guidance

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element	Learning outcome
Civil protection duties relating to legislation and national guidance	Understand the legal responsibilities and duties relating to civil protection: <ul style="list-style-type: none">• Fire and rescue service legislation• Civil Contingencies Act 2004• Emergency preparedness• Emergency response and recovery

Practical application

Control measure element

Learning outcome

Carry out civil protection duties relating to legislation and national guidance

- The operational implementation of civil protection duties in accordance with legislation and national guidance:
 - Risk assessment
 - Business continuity management (BCM)
 - Emergency planning
 - Maintaining public awareness and arrangements to warn, inform and advise the public
 - Co-operation
 - Information sharing

Hazard - Overwhelmed/overloaded communications systems

Knowledge and understanding

Hazard

Learning outcome

Overwhelmed/overloaded communications systems

Understand all associated hazard knowledge

Control measure - Manage congestion of radio communications on the incident ground

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Manage congestion of radio communications on the incident ground

- The systems and channels used for inter-intraoperable communication
- The role of the operational communications advisers
- The purpose of the network monitoring centre (NMC)
- The use of and access to multi-agency talk groups

Practical application

Control measure element

Learning outcome

Manage congestion of radio communications on the incident ground

- The use of standard communication protocols
- The ability to develop effective solutions to communication problems using the assistance of an operational communications adviser

Hazard - Ineffective multi-agency working

Knowledge and understanding

Hazard

Learning outcome

Ineffective multi-agency working

Understand all associated hazard knowledge

Control measure - Multi-agency co-location

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Multi-agency co-location

- The purpose and benefits of multi-agency co-location
- The process and systems used to implement multi-agency co-location

Practical application

Control measure element

Learning outcome

Multi-agency co-location

- The ability to lead the co-location of emergency responders in accordance with JESIP
- Liaison with tactical commanders at the co-location point and gathering appropriate information to inform decisions

Control measure - Multi-agency communication

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Multi-agency communication

- The purpose and benefits of multi-agency communication
- The process and systems used to implement multi-agency communication

Practical application

Control measure element

Learning outcome

Implement appropriate systems to ensure effective communication between the responding multi-agencies

- Exchange reliable and accurate information about hazards, risks and threats
 - Communicate clearly using plain English
 - Ensure information shared is free from acronyms and other potential sources of confusion
 - Use multi-agency briefings to gain an understanding of the capabilities of other responding agencies
 - Ensure information shared is understood and agreed by all involved in the response
- See National Operational Guidance, training specification: Incident command - [Clearly defined command roles and responsibilities, incorporating multi-agency arrangements](#)

Control measure - Multi-agency co-ordination

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Multi-agency co-ordination

- The purpose and benefits of multi-agency co-ordination
- The process and systems used to implement multi-agency co-ordination

Practical application

Control measure element

Learning outcome

Co-ordinate multi-agency response

- Chair/attend co-ordinating meetings
- Schedule regular co-ordinating meetings and ensure they take place as intended

Control measure - Joint understanding of risk

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Joint understanding of risk from responding agencies

- The purpose and benefits of multi-agency joint understanding of risk
- The process and systems used to ensure multi-agency joint understanding of risk

Practical application

Control measure element

Learning outcome

Ensure joint understanding of risk from responding agencies

- As tactical incident commander, complete an appropriate dynamic risk assessment and share the outcomes with other responding agencies
- Develop a shared risk assessment with other responding agencies

Control measure - Shared situational awareness

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Shared situational awareness of all responding agencies

Learning outcome

- The purpose and benefits of multi-agency shared situational awareness
- The process and systems used to ensure multi-agency shared situational awareness

Practical application

Control measure element

Share situational awareness with all responding agencies

Learning outcome

- The ability to ascertain the priorities of all responding agencies and collate this information into strategic plans
- The effective use of the M/ETHANE message structure

Hazard - Ineffective strategic response arrangements to support major incidents

Knowledge and understanding

Hazard

Ineffective strategic response arrangements to support major incidents

Learning outcome

Understand all associated hazard knowledge

Control measure - Local emergency planning group arrangements

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Local emergency planning group arrangements

Learning outcome

- The legislative requirements regarding multi-agency arrangements for the strategic co-ordination of major incidents
- The local arrangements regarding emergency planning for major incidents

Practical application

Control measure element

Use effective local emergency planning group arrangements - TS - MIN

Learning outcome

- As tactical incident commander demonstrate the ability to:
- Access the appropriate level and type of support from strategic commanders at major incidents
 - Share situational awareness with tactical and strategic commanders to inform a Common Operating Picture (COP)
- As strategic incident commander demonstrate the ability to:
- Work with tactical incident commanders and other members at the co-ordinating group to develop a Common Operating Picture (COP) and joint understanding of risk

Control measure - Strategic co-ordinating groups

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Strategic co-ordinating groups and regional resilience partnerships

- The purpose and benefits of strategic level co-ordinating groups and regional resilience partnerships
- The process and systems used to instigate strategic level co-ordinating groups and regional resilience partnerships

Practical application

Control measure element

Learning outcome

Use strategic co-ordinating groups and regional resilience partnerships

- As tactical incident commander demonstrate the ability to:
- Carry out delegated actions to deliver co-ordinating groups' objectives
- As strategic incident commander demonstrate the ability to:
- Delegate appropriate actions to tactical incident commanders to deliver co-ordinating groups' objectives
 - Ensure that tactical commanders both remote and on-scene are familiar with co-ordinating group establishment and ways of working, and that they can support the establishment and continuation of a co-ordinating group for as long as is necessary
 - Ensure that tactical commanders who are sent to a co-ordinating group have an appropriate level of authority to make decisions on behalf of their organisation

Control measure - Tactical co-ordinating groups

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Tactical co-ordinating groups and local resilience partnerships

Learning outcome

- The purpose and benefits of tactical level co-ordinating groups and local resilience partnerships
- The process and systems used to instigate tactical level co-ordinating groups and local resilience partnerships

Practical application

Control measure element

Use tactical co-ordinating groups and tactical resilience partnerships

Learning outcome

As tactical incident commander demonstrate the ability to:

- Assess significant risks and use this to inform tasking of operational commanders
- Determine priorities for allocating available resources
- Plan and co-ordinate how and when tasks will be undertaken
- Obtain additional resources if required
- Establish effective communications with both on-scene commanders and any strategic level co-ordinating group

Control measure - Additional resources: Major incidents

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Additional resources: Major incidents

- The local scalable arrangements and systems used to manage large/protracted incidents
- The local resources and roles used for the management of major incidents

Practical application

Control measure element

Learning outcome

Use additional resources: Major incidents

- As tactical incident commander demonstrate the ability to:
- Implement the type and level of support of that an ongoing major incident should receive, and how the structural arrangements will work
 - Plan ahead at the incident to predict and request resource requirements as far in advance as practicable
 - Establish clear lines of communication with all the relevant pieces of the operational support parties that are in place to assist them
- As strategic incident commander demonstrate the ability to:
- Ensure that the appropriate scale of command support arrangements is instigated
 - Establish the use of a major incident room or support cell to provide additional support to fire control, and strategic, tactical and operational commanders
 - Ensure that sufficient resources are available following consultation of risk management plans

Hazard - Major resource requirements

Knowledge and understanding

Hazard

Learning outcome

Major resource requirements

Understand all associated hazard knowledge

Control measure - National Coordination and Advisory Framework (NCAF) and mutual aid arrangements

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

National Coordination and Advisory Framework (NCAF) and mutual aid arrangements

- The purpose and benefits of National Coordination and Advisory Framework (NCAF) and mutual aid arrangements
- The process and systems used to instigate National Co-ordination and Advisory Framework (NCAF) and mutual aid arrangements

Practical application

Control measure element

Learning outcome

Use the National Coordination and Advisory Framework (NCAF) and mutual aid arrangements to manage major incidents

- Seek appropriate advice from tactical advisers to establish resource requirements
- Implement the NCAF arrangements and make arrangements for multi-agency response and the use of national assets
- Identify and agree the establishment of multi and single agency strategic holding areas using specific functional officers

Control measure - National Resilience Assurance Team (NRAT) and National Resilience Fire Control (NRFC)

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

National Resilience Assurance Team (NRAT) and National Resilience Fire Control (NRFC)

Learning outcome

- The purpose and benefits of National Resilience Assurance Team (NRAT) and National Resilience Fire Control (NRFC)
- The process and systems used to instigate National Resilience Assurance Team (NRAT) and National Resilience Fire Control (NRFC)

Practical application

Control measure element

Consult National Resilience Assurance Team (NRAT) and National Resilience Fire Control (NRFC)

Learning outcome

- Provide the NRFC with daily electronic updates on the availability of National Assets, using the NCAF Electronic Support System (NCAF ESS)
- Establish and maintain communications with NRFC at all times
- Liaise with the NRAT duty officer
- Establish contact where necessary with National Strategic Advisory Team (NSAT)

Control measure - Government liaison

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Government liaison

- The purpose and benefits of government liaison
- The process and systems used to instigate government liaison
- The principles set out in:
 - Responding To Emergencies, The UK Central Government Response, Concept Of Operations

Practical application

Control measure element

Learning outcome

Liaise with government liaison officers

- Liaise with government liaison officers to:
 - Share relevant and timely information with central government
 - Establish priorities and provide advice to COBR when required
 - Request deployment of additional resources where appropriate

Hazard - Public awareness

Knowledge and understanding

Hazard

Learning outcome

Public awareness

Understand all associated hazard knowledge

Control measure - Warn, inform, instruct and

update people: Major incidents

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element	Learning outcome
Warn, inform, instruct and update people: Major incidents	<ul style="list-style-type: none">• The process and systems used to warn, inform, instruct and update people during a major incident• The support mechanisms available via government to warn, inform, instruct and update people during major incidents See National Operational Guidance, training specification: Operations - Warn, inform, instruct and update people

Practical application

**Control measure
element**

Learning outcome

Warn, inform, instruct
and update people:
Major incidents

- Agree the identity of lead responders to warn, inform and advise the public on those scenarios which can reasonably be anticipated
 - Agree and implement joint working procedures and allocation of responsibilities in support of the lead responder for warning, informing and advising
 - Agree the trigger points for the handover of the lead responsibility for warning, informing and advising from one responder body to another and the procedures to achieve this
 - Agree how services or products for warning, informing and advising (e.g. equipment for media centres) will be sourced
 - As appropriate, agree with local companies and organisations the circumstances in which their facilities or resources (e.g. premises, call centres), may be made available to the responder bodies, to help deliver advice and information to the public during an emergency
- See National Operational Guidance, training specification:
Operations - [Warn, inform, instruct and update people](#)

Control measure - Media Liaison Officer (MLO)

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Media Liaison Officer (MLO)

- The role and responsibilities of the Media Liaison Officer (MLO)
- How the Media Liaison Officer (MLO) can be of benefit to the incident commander

Practical application

Control measure element

Learning outcome

Use media liaison officers (MLO)

- Recognise the requirement for media liaison
- Brief media liaison officers (MLO)
- Liaise with media liaison officers (MLO) and strategic commanders on co-ordinating media interaction

Hazard - Multiple casualties

Knowledge and understanding

Hazard

Learning outcome

Multiple casualties

Understand all associated hazard knowledge

Control measure - Plan reception centres

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Reception centres

Understand:

- The behaviours of people post incident
- The arrangements for establishing reception centres
- The agencies who can provide additional specialist assistance

Practical application

Control measure element

Learning outcome

Use reception centres to cater for the needs of people at an emergency incident

Demonstrate the ability to:

- Identify the requirement to set up a reception centre for an incident
- Instigate service protocol for establishing a reception centre
- Communicate and support partner agencies to set up and maintain a reception centre

Control measure - Establish a triage sieve (adult and paediatric)

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element

Learning outcome

Establish a triage sieve (adult and paediatric)

Understand:

- The benefits of carrying out a triage sieve
- How the triage sieve will be implemented and managed throughout the incident
- The actions to be carried out during a triage sieve

Practical application

Control measure element

Learning outcome

Establish a triage sieve (adult and paediatric)

Demonstrate the ability to:

- Identify casualties requiring medical attention and instigate a triage sieve
- Apply appropriate procedures to record and communicate relevant information to medical responders

Control measure - Mass casualty and fatality plans

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element	Learning outcome
Mass casualty and fatality plans	<ul style="list-style-type: none"> • The purpose and benefits of mass casualty and fatality plans • The term 'mass casualties' • The information on which mass casualty and fatality plans are based • The contents to be included within the casualty management plan • The process of inclusion for the casualty management plan within the joint decision making process and briefings

Practical application

Control measure element	Learning outcome
Use and/or develop mass casualty and fatality plans	<ul style="list-style-type: none"> • Jointly agree casualty management plans with other relevant agencies, taking account of the tactical options available • Communicate hazards identified in the inner cordon or hazard zone as part of the process • Support other on-scene commanders with the nomination of casualty collection point (CCP) and casualty clearing station (CCS) locations • Communicate the casualty management plan to other relevant personnel

Control measure - Use casualty transport equipment

TRAINING SPECIFICATION

Knowledge and understanding

Control measure element	Learning outcome
--------------------------------	-------------------------

Use casualty transport equipment

Understand:

- How to use casualty transport equipment
- The techniques used to transport casualties when utilising transport equipment
- How to request casualty transport resources from other organisations

Practical application

Control measure element	Learning outcome
--------------------------------	-------------------------

Use casualty transport equipment

Demonstrate the ability to:

- Assess the need for other agencies or specialist equipment to transport casualties
- Use appropriate procedures and equipment to transport casualties
