## Hazard - Fire water run-off

---

### Knowledge and understanding

---

Hazard	Learning outcome
Fire water run-off	Understand all associated hazard knowledge

## Control measure - Controlled burning

---

### TRAINING SPECIFICATION

### Knowledge and understanding

---

Control measure element	Learning outcome
Controlled burning	Understand: <ul style="list-style-type: none"><li>• Why a controlled burn may limit the impact on the environment</li><li>• When a controlled burn can be considered</li><li>• The need to seek specialist advice and from whom</li><li>• The effects of using positive pressure ventilation to accelerate a controlled burn</li><li>• The techniques used to introduce an accelerated control burn</li><li>• The techniques that can be used in conjunction with a controlled burn</li></ul>

### Practical application

**Control measure element**

**Learning outcome**

Controlled burning

Demonstrate the ability to:

- Use equipment to accelerate burning in line with service procedures
- Protect surroundings during a controlled burn

## Control measure - Containment

### TRAINING SPECIFICATION

#### Knowledge and understanding

**Control measure element**

**Learning outcome**

Containment

Understand:

- The need for containment of polluting liquids including fire water run-off
- When containment tactics should be implemented
- The hierarchy of containment tactics and equipment
- How to identify site drainage
- The importance of drainage plans
- The difference between discharges to surface and foul water
- How to identify an oil separator and pollution control features

#### Practical application

**Control measure element**

**Learning outcome**

Containment

Demonstrate the ability to:

- Apply the environmental protection hierarchy to contain fire water run-off and other polluting liquids
- Communicate risk information to relevant agencies

## Control measure - Recycling

---

### TRAINING SPECIFICATION

#### Knowledge and understanding

---

Control measure element	Learning outcome
Recycling	<p>Understand:</p> <ul style="list-style-type: none"><li>• The effects of recycling fire water run-off</li><li>• That materials within concentrated fire water run-off may preclude its use as an extinguishing agent</li><li>• The need to seek advice when disposing of recycled fire water run-off</li><li>• The health risks associated with fire water run-off</li></ul>

#### Practical application

---

Control measure element	Learning outcome
Recycling fire water run-off	<p>Demonstrate the ability to:</p> <ul style="list-style-type: none"><li>• Use appropriate equipment when recycling fire water run-off</li><li>• Apply appropriate techniques for recycling fire water run-off</li><li>• Use appropriate control measures to mitigate the effects of fire water run-off</li><li>• Apply an appropriate process for disposal of concentrated fire water run-off</li></ul>

## Control measure - Reduction

---

## TRAINING SPECIFICATION

### Knowledge and understanding

---

#### Control measure element

#### Learning outcome

Reduction	<p>Understand:</p> <ul style="list-style-type: none"> <li>• How to reduce the amount of firewater run-off at an incident</li> <li>• How to use tactics to reduce fire water run-off without increasing the risk of fire spread or affecting safety</li> </ul>
-----------	---

### Practical application

---

#### Control measure element

#### Learning outcome

Using reduced quantities of water at an incident	<p>Demonstrate the ability to:</p> <ul style="list-style-type: none"> <li>• Apply a reduced 'use of water' strategy without significantly increasing risk of fire spread</li> </ul> <p>Refer to <a href="#">Control measure – Controlled burn</a> Refer to <a href="#">National Occupational Guidance: Fires and firefighting- Select the appropriate firefighting technique</a></p>
--	--

## Control measure - Disposal

---

## TRAINING SPECIFICATION

### Knowledge and understanding

**Control measure  
element**

**Learning outcome**

Disposal

Understand:

- The requirement to dispose of pollutants including fire water run-off produced at an incident legally and responsibly
- How to identify who is responsible for the disposal of waste at an incident
- The options available to a fire and rescue service to dispose of waste produced at an incident
- The need to inform relevant authorities as early as practicable

**Practical application**

**Control measure element**

**Learning outcome**

Disposing of fire water run-off

Demonstrate the ability to:

- Identify and communicate with the person responsible for disposal of fire water run-off
- legally and responsibly dispose of fire water run-off

## Control measure - Operational risk information plan

### TRAINING SPECIFICATION

#### Knowledge and understanding

**Control measure element**

**Learning outcome**

Operational risk information plan	<p>Understand:</p> <ul style="list-style-type: none"> <li>• How to use an environmental risk assessment within operational risk plans</li> <li>• The actions necessary when a risk to the environment has been identified</li> </ul> <p>Refer to Incident command training specification – Situational awareness</p>
-----------------------------------	--

**Practical application**

**Control measure element**

**Learning outcome**

Operational risk information plan	<p>Demonstrate the ability to:</p> <ul style="list-style-type: none"> <li>• Identify pollution prevention information from site specific plans</li> <li>• Implement environmental protection measures identified in operational risk plans</li> <li>• Monitor and minimise the impact of fire service tactics on the identified environmental risk</li> <li>• Assess and monitor the effectiveness of fixed installations and pollution prevention measures</li> </ul>
-----------------------------------	--

## Control measure - Site-Specific Risk Information (SSRI)

### TRAINING SPECIFICATION

#### Knowledge and understanding

**Control measure element**

**Learning outcome**

Site-Specific Risk Information Plan	Refer to Operations training specification
-------------------------------------	--

**Practical application**

---

**Control measure element**

**Learning outcome**

Site-Specific Risk Information Plan

Refer to Operations training specification

**Control measure - Emergency response plans**

---

**TRAINING SPECIFICATION**

**Knowledge and understanding**

---

**Control measure element**

**Learning outcome**

Emergency response plans

Refer to Operations training specification

**Practical application**

---

**Control measure element**

**Learning outcome**

Emergency response plans

Refer to Operations training specification
