### TRAINING SPECIFICATION

#### Knowledge and understanding

---

Control measure element	Learning outcome
Manage the radiation dose received by firefighters to as low as reasonably practicable (ALARP)	<p>Understand:</p> <ul style="list-style-type: none"><li>• The factors for managing exposure to radiation:<ul style="list-style-type: none"><li>- Time</li><li>- Distance</li><li>- Shielding</li></ul></li><li>• The use of personal dosimeters</li><li>• The use of dose rate survey meters</li><li>• The considerations prior to an exposure event</li></ul>

#### Practical application

---

**Control measure element**

Manage the radiation dose received by firefighters to as low as reasonably practicable (ALARP)

**Learning outcome**

Demonstrate the ability to:

- Assess the need for fire service exposure to radiation source(s)
- Employ the principles for managing exposure to radiation:
  - Time
  - Distance
  - Shielding
- Use personal dosimeters
- Use dose rate survey meters
- Monitor and record radiation exposure information
