

About you

*** In case we need to contact you, please provide the following information:**

Name

Organisation

Email address

Telephone number

*** Are you responding as:**

- A representative of your organisation
- A representative of a regional group
- A representative of a functional group
- An individual

Introduction and information

The draft content has been created to assist fire control personnel when providing fire survival guidance to a single call; however, the guidance can be applied multiple times.

Due to project priorities and associated deadlines, it has been necessary to release this partial publication. Normally the full suite of survival guidance would be completed prior to peer review and consultation.

This section includes fire survival guidance in a building; however, the final publication will be a suite of fire survival guidance across a variety of incidents.

The content provides guidance on the practical application of fire survival guidance, from the point where it has been established that people at risk are unable to evacuate the building. It has been written to complement other pieces of guidance, including Emergency call management - people at risk.

Emergency call management - people at risk will provide guidance that is applicable to all calls involving people at risk, including:

- Evacuation guidance
- Reassurance to callers
- Multiple calls about people at risk
- Joint situational awareness

Please provide sufficient detail in your comments for us to determine what content they relate to, along with the page number of the PDF document.

Please complete the survey by midday Friday 5 February 2021. If you have any questions or experience any difficulties in completing the survey, please email FireCPO@nationalfirechiefs.org.uk

Introduction

Are there any errors or omissions in the introduction?

Calls from or about people at risk trapped in a building fire

This hazard has three control measures. Please provide your comments for each component.

Hazard - Calls from or about people at risk trapped in a building fire

Control measure - Situational awareness: Fire survival guidance – building fire

Control measure - Protect people at risk: Fire survival guidance – building fire

Control measure - Assist rescue of people at risk: Fire survival guidance – building fire

Final thoughts

Do you believe that your fire and rescue service would find adoption of this guidance...
